XO-PS Intelligent PPS Pallet Wrapping Machine

Product Application

1. Pallet stretch wrapping machine for use with 250% LLDPE power pre-stretch film for wrapping palletised goods.
2. Secures and protects goods from dust, moisture, pilferage or damage.
3. This pallet wrapping machine has been widely used across all industries requiring a PPS type wrap film for maximum economy in use. Ideal for medium usage for around 10 – 20 pallets per hour.

X-LINE Operation System

1. Features on screen programming and troubleshooting guide for clear simple operation and easy maintenance.
2. 250% PPS unit as standard (other ratio options available to order)
3. Six password protected named user set programs featuring individual speed settings for turntable, carriage up and down. Bottom and Top wrap rotations and pallet overlap timer, variable lay on force, with automatic repeat facility to apply extra wraps. Plus manual operation.
4. Total pallet counter, and resettable pallet counter for daily / weekly pallet counts.
5. Integrated printed circuit board for reliable operation.

Advanced Safety Technology

All Steel powder coated frame and extruded aluminium mast, for maximum strength. Roller chain driven turntable and carriage ensuring a long operating life.

Safety device under film carriage to protect the operators foot or head. If the trip is actuated the machine will automatically stop and the alarm will illuminate.

Should it become necessary, the control panel will guide the operator through the fault reset procedure with clear instruction and graphics. The SMART WASP is designed with safety and ease of use in mind.

Mechanical film braked roller ensures the pallet is securely wrapped, with easy in cycle operator adjustment.

Main Features

1. 1,650 mm Turntable driven by heavy duty $\frac{3}{4}$ " chain.
2. 2,200 mm Max packing height.
3. 2,000 Kg Max load weight.
4. 250% pre-stretch ratio, saving on film cost.
5. Pre-stretch film device for high packing efficiency.
6. Comprehensive safety protection system.

Intelligent LED Light

1. LED indicator on machine mast.

Green	Working.
Blue	Ready.
Red	Alarm.
