K 03 Combined Pallet Stacking and Wrapping Machine

Product Application

1. For the automatic palletising of goods up to 30 kg each from a powered conveyor.
2. Wraps the pallet when the pallet stacking is completed.
3. Pallets may be removed from the turntable by manual pallet truck, or by our fully automatic autonomous robot.

X-LINE Operation System

1. Features simple intuitive programming screen with troubleshooting guide for clear simple operation.
2. Password protected to prevent unauthorised program changes.
3. Total pallet counter with resettable counter for period counts.
4. Programmable to allow for box size changes and stacking specification on the pallet.

Efficient Wrapping

1. Film applied with a 250% stretch ratio for economical use and even tension to the full height of the pallet.
2. Every pallet wrapped to the same specification, with guaranteed stability.
3. Goods wrapped without additional movement, increasing efficiency.

Main Features

1. Maximum pallet size up to 1,000 mm x 1,200 mm.
2. Up to 2,200 mm wrapping height, automatically detected.
3. Maximum load weight up to 2,000 Kg.
4. PPS roller film stretching for efficient film usage.
5. Comprehensive safety protection system.
