## X1 Intelligent PPS Pallet Wrapping Machine

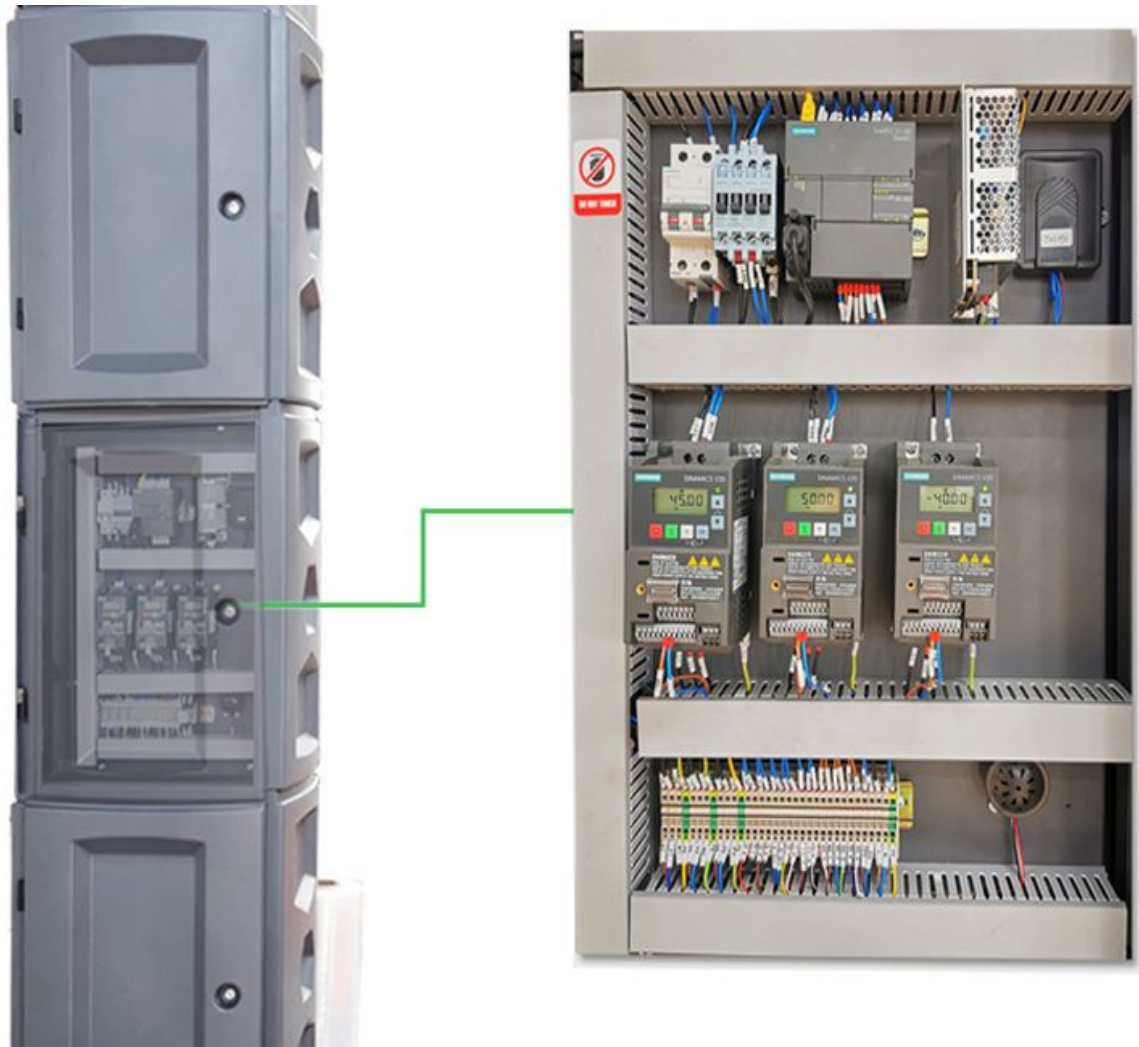

### Product Application

1. Pallet stretch wrapping machine for use with LLDPE power pre-stretch film for wrapping palletised goods.
2. Secures and protects goods from dust, moisture, pilferage or damage.
3. This pallet wrapping machine has been widely used across all industries requiring a PPS type wrap film for maximum economy in use. Ideal for medium usage for around 10 – 20 pallets per hour.

VAT Number GB 728 3025 45 • Company Number 04170976

## X-LINE Operation System

1. Siemens PLC
2. Siemens Inverter
3. X-LINE Touch Screen.
4. SICK Proximity Switch.
5. AUTONICS Photo-electric Switch.
6. WEIDMULLER Terminal Block.

## Six Memory Functions and One Button Start

1. Six program memory function to simplify parameter recall.
2. Manual wrapping program for awkward loads
3. One button start, for more convenient machine operation.
4. Features on screen troubleshooting guide. Clear simple operation. Easy maintenance.
5. Password protected operator adjustments to prevent unauthorised modifications.
6. Total pallet counter, and resettable pallet counter for daily / weekly pallet counts.
7. Individual settings for turntable, carriage up and down speeds. Bottom wrap turn count. Top wrap turn count. Pallet overlap timer. Automatic repeat facility to apply extra wraps.

## Savings on Film Costs

1. Pre-stretch film dispenser, giving up to 380% film pre-stretch prior to application.
2. Maximize the value of each metre of stretch film.
3. Variable lay on force.

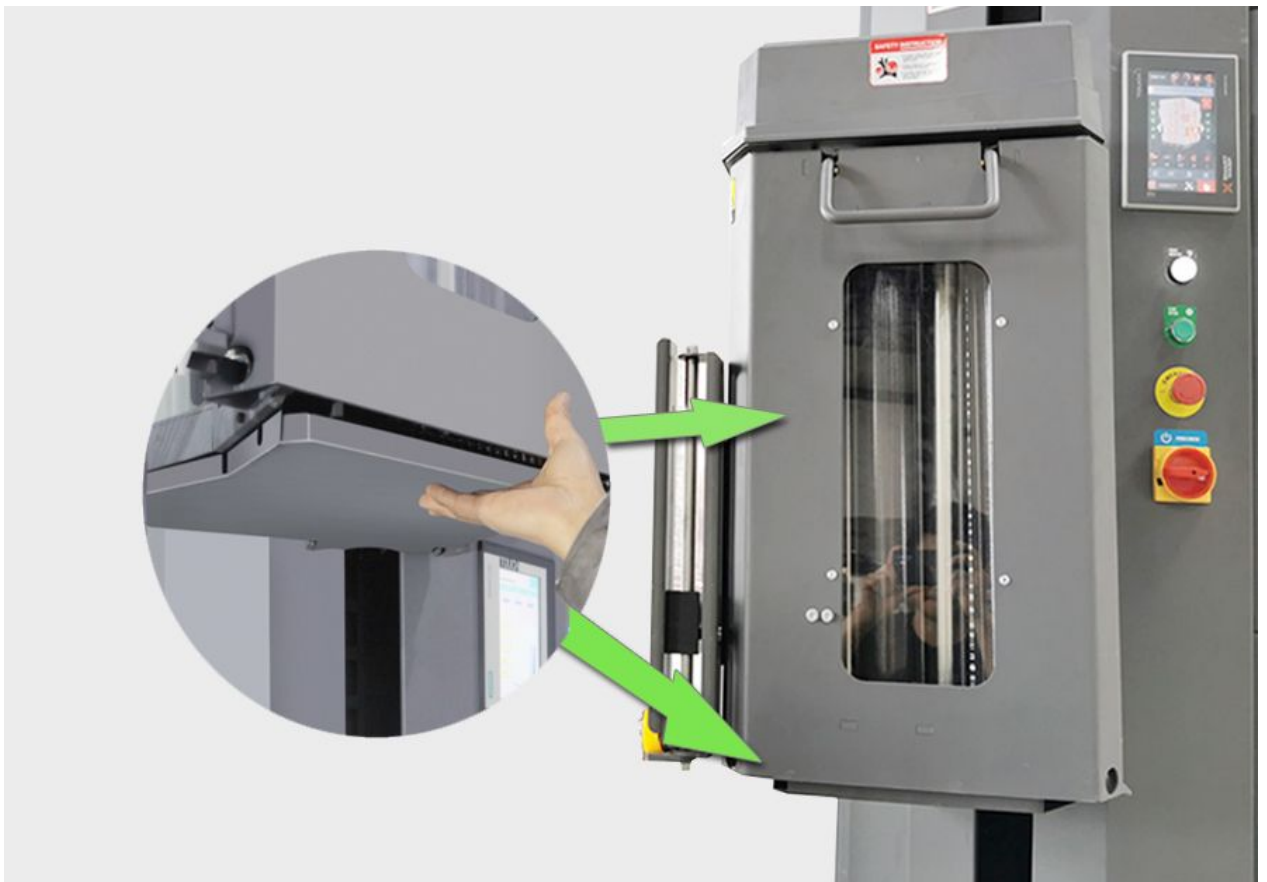

## Advanced Safety Technology

Safety device under film carriage to protect the foot or head of the operator. If the trip is actuated the machine will automatically stop and the alarm will illuminate.

The control panel will guide the operator through the reset procedure. SMART WASP is designed with safety in mind.

Mechanical film braked roller ensures the pallet is securely wrapped, with easy in cycle operator adjustment.

## Main Features

1. 1,650mm Turntable.
2. 2,000mm packing height.
3. Max load weight – 2,000 Kg.
4. Up to 380% pre-stretch ratio saving on film cost.
5. Pre-stretch film device for high packing efficiency.
6. Comprehensive safety protection system.

## Intelligent LED Light

1. LED indicator on machine mast.

Green	Working
Blue	Ready
Red	Alarm
2. If in alarm state the touch screen guides you in how to reset the machine or to resolve any other problems.
